Traffic Safety. From a different Point of View.

ProContour H3-D – A step toward “Vision Zero”

Tires are numbered among the most common mechanical causes of accidents. We know: these accidents are avoidable. With ProContour H3-D, you get one step closer to “Vision Zero”. We are working to increase traffic safety and want to invite you to our informational meeting with presentations by Welf Stankowitz, German Road Safety Council, and Franz Nowakowski, DEKRA.

ProContour H3-D serves to automatically measure the tire profile in moving traffic. We'll show you how that works.

See for yourself!

February 12th, at 11:00 AM

Hotel Bercher
Meeting Room “ProContour”
Bahnhofstraße 1
D-79761 Waldshut-Tiengen

What should you expect?

- Presentation by Welf Stankowitz, German Road Safety Council: “Vision Zero”
- Presentation by Franz Nowakowski, DEKRA: “Tires as cause of accident”
- Demonstration of ProContour H3-D

We look forward to seeing you!
